

# Package ‘RcppDate’

October 12, 2022

**Type** Package

**Title** 'date' C++ Header Library for Date and Time Functionality

**Version** 0.0.3

**Date** 2021-05-19

**Author** Dirk Eddelbuettel

**Maintainer** Dirk Eddelbuettel <edd@debian.org>

**Description** A header-only C++ library is provided with support for dates, time zones, ISO weeks, Julian dates, and Islamic dates. 'date' offers extensive date and time functionality for the C++11, C++14 and C++17 standards and was written by Howard Hinnant and released under the MIT license. A slightly modified version has been accepted (along with 'tz.h') as part of C++20. This package regroups all header files from the upstream repository by Howard Hinnant so that other R packages can use them in their C++ code. At present, few of the types have explicit 'Rcpp' wrappers though these may be added as needed.

**License** GPL (>= 2)

**Suggests** Rcpp

**URL** <https://github.com/eddelbuettel/rcppdate>,  
<https://dirk.eddelbuettel.com/code/rcpp.date.html>

**BugReports** <https://github.com/eddelbuettel/rcppdate/issues>

**NeedsCompilation** no

**Repository** CRAN

**Date/Publication** 2021-05-19 12:30:02 UTC

## Description

A header-only C++ library is provided with support for dates, time zones, ISO weeks, Julian dates, and Islamic dates. 'date' offers extensive date and time functionality for the C++11, C++14 and C++17 standards and was written by Howard Hinnant and released under the MIT license. A slightly modified version has been accepted (along with 'tz.h') as part of C++20. This package regroups all header files from the upstream repository by Howard Hinnant so that other R packages can use them in their C++ code. At present, few of the types have explicit 'Rcpp' wrappers though these may be added as needed.

## Package Content

Index of help topics:

RcppDate-package      'date' C++ Header Library for Date and Time  
Functionality

## Maintainer

Dirk Eddelbuettel <edd@debian.org>

## Author(s)

Dirk Eddelbuettel

## Examples

```
## see the source files in the examples/ directory of the package
## check for (optional, only in Suggests:) Rcpp, and ensure we are
## not on Windows as this runs up to the ten second time limit
if (requireNamespace("Rcpp", quietly=TRUE) && (.Platform$OS.type != "windows")) {
  Rcpp::sourceCpp(system.file("examples", "year_month_day.cpp", package="RcppDate"))
}
```
