- Minor anchor adjustment to final heh on Allah ligature
- Fix design of simplified form U+FDCE ARABIC LIGATURE SALAAMUHU ALAYNAA in Medium and SemiBold weights

Known issues

- Shaping for the newly added characters may not yet occur in applications
- Medial and final high hamza characters may have collisions (these likely do not occur)
- Lam + high hamza alef ligature does not form as it likely does not occur
- In InDesign: some behaviors, such as the *lam-alef* ligature, raised *kasra* with *shadda*, and subtending marks, will not function correctly unless **Ligatures** is turned on in the **Characters** panel.

Both desktop and web fonts are provided in a single, all-platforms package on the [Download page](#).
