1 Aim of the package

The default citation styles `verbose-trad1`; `verbose-trad2`; `verbose-trad3` use the *op. cit.* form in order to have shorter reference when a title have been already cited.

However, when you cite two entries which share the same booktitle but not the same title, the *op. cit.* mechanism does not work.

For example we obtain the following example:

Actes de Barnabé. In: *Écrits apocryphes chrétiens*. Trans. and annot. by Enrico Norelli. Vol. 2. Bibliothèque de la Pléiade 516. Paris: Gallimard, 2005, pp. 627–642

Pseudo-Hippolyte. *Index apostolorum discipulorumque Domini.* In: *Prophetarum vitae fabulosae indices apostolorum discipulorumque Domini Dorotheo · Epiphonio · Hippolyto aliisque vindicata*. Ed. by Theodor Schermann. Leipzig: Teubner, 1907, pp. 163–170

Actes de Tite. In: *Écrits apocryphes chrétiens*. Trans. and annot. by Willy Rordorf. Vol. 2. Bibliothèque de la Pléiade 516. Paris: Gallimard, 2005, pp. 609–615

Pseudo-Épiphane. *Index apostolorum discipulorumque Domini.* In: *Prophetarum vitae fabulosae indices apostolorum discipulorumque Domini Dorotheo · Epiphonio · Hippolyto aliisque vindicata*. Ed. by Theodor Schermann. Leipzig: Teubner, 1907, pp. 107–126

While we would like to obtain:

Actes de Barnabé. In: *Écrits apocryphes chrétiens*. Trans. and annot. by Enrico Norelli. Vol. 2. Bibliothèque de la Pléiade 516. Paris: Gallimard, 2005, pp. 627–642

Pseudo-Hippolyte. *Index apostolorum discipulorumque Domini*. In: *Prophetarum vitae fabulosae indices apostolorum discipulorumque Domini Dorotheo · Epiphanio · Hippolyto aliisque vindicata*. Ed. by Theodor Schermann. Leipzig: Teubner, 1907, pp. 163–170

Actes de Tite. In: *Écrits apocryphes chrétiens*. Trans. and annot. by Willy Rordorf. Vol. 2. Op. cit., pp. 609–615

Pseudo-Épiphane. *Index apostolorum discipulorumque Domini*. In: *Prophetarum vitae fabulosae indices apostolorum discipulorumque Domini Dorotheo · Epiphanio · Hippolyto aliisque vindicata*. Ed. by Theodor Schermann. Op. cit., pp. 107–126

The aim of this package is to enable such abbreviation.

2 Use

The biblatex-opcit-booktitle package must be loaded after the biblatex package. You must use a verbose-trad citation style. For example:

```
\usepackage[bibstyle=verbose,citestyle=verbose-
↪ trad1,citepages=omit]{biblatex}
\usepackage{biblatex-opcit-booktitle}
```

In order to know when two entry share the same booktitle, you must use the crossref mechanism of biblatex. In the case of the previous example, we used:

```
@book{Pleiade2,
  Address = {Paris},
  Number = {516},
  Publisher = {Gallimard},
  Series = {Bibliothèque de la Pléiade},
  Title = {Écrits apocryphes chrétiens},
  Volume = {2},
  Year = {2005}}
```

```
@bookinbook{Pleiade_Barnabe,
  Annotator = {Enrico Norelli},
  Crossref = {Pleiade2},
  Pages = {627-642},
  Title = {Actes de Barnabé},
  Translator = {Enrico Norelli}}
```

```
@bookinbook{Pleiade_Tite,
```

```

Annotator = {Willy Rordorf},
Bhg = {1850z},
Crossref = {Pleiade2},
Pages = {609-615},
Title = {Actes de Tite},
Translator = {Willy Rordorf}}

@book{Schermann1907,
  Address = {Leipzig},
  Editor = {Theodor Schermann},
  Publisher = {Teubner},
  Title = {Prophetarum vitae fabulosae indices apostolorum discipulorumque
↪ Domini Dorotheo · Epiphanio · Hippolyto aliisque vindicata},
  Year = {1907}
}

@bookinbook{Pseudo-Hippolyte,
  Author = {{Pseudo-Hippolyte}},
  Crossref = {Schermann1907},
  Pages = {163-170},
  Title = {Index apostolorum discipulorumque Domini}}

@bookinbook{Pseudo-Epiphanie,
  Author = {{Pseudo-Épiphanie}},
  Crossref = {Schermann1907},
  Pages = {107-126},
  Title = {Index apostolorum discipulorumque Domini}}

```

There is not other thing to do!

The feature works with these entrytypes: @inbook, @incollection, @inproceedings, @bookinbook.

If you define a shorttitle in the main entry, it will be used instead of the full title when we need an abbreviated form.

2.1 Limits

We have not implemented options to use abbreviation like *ibid*, because we want to have not ambiguous abbreviated forms.

If you have redefined the cite bibliographic macro, you must changes:

```

\usebibmacro{cite:full}%
\usebibmacro{cite:save}

```

by:

`\usebibmacro{cite:test:ifrelated}`

2.2 Customization

You can change the `inbook:rel` bibliographic driver to customize the way the main title is printed.

3 Credits

This package was created for Maïeul Rouquette’s phd dissertation¹ in 2015. It is freely inspired by Paul Stanley code.² It is licensed on the *LT_EX Project Public License*.³

All issues can be submitted, in French or English, in the Framasoft issues page⁴.

4 Change history

1.1.1 2015-07-02

Fix spurious space.

1.1.0 2015-06-18

If defined, use the `shorttitle` field of the main entry.

1.0.2 2015-06-05

Wrap “op. cit” in `\mkibid`.

1.0.1 2015-06-03

Correct order of name’s part (first name / last name).

1.0.0 2015-05-31

First public release.
